Data Quality Reports

Report Name: Current Year EOYA Submission Comparison Report
Report Description: This report will help school and district staff determine if the correct number of EOYA records have been submitted. The report will use the criteria used to populate the Current Year Accountability Student's report and submitted EOYA records to help show the user what data has been submitted for their building.
KIDS Record Type: EOYA
Update/ Refresh Cycle: Automatic

Report Name: ENRL Submission Comparison Report
Report Description: This report shows the count of students submitted by a building or district for the current and prior year. The building level report will break the counts down by grade level. The district level report will show building totals only.
KIDS Record Type: ENRL
Update/ Refresh Cycle: Automatic

Report Name: EOYA Prior Year Subgroup Comparison Report
Report Description: This report shows the comparisons of data submitted on EOYA records for the current and prior years, disaggregated by reporting subgroups. This report will allow schools and districts to see if their data was submitted consistent to what was reported in the prior year.
KIDS Record Type: EOYA
Update/ Refresh Cycle: Automatic

Report Name: EOYA/EXIT Assignment Comparison Report
Report Description: This report shows the students that have been claimed by a particular school or district as the Accountability School during the current school year and have not had an EOYA record submitted to the KIDS Collection System. The report also includes students not claimed, but where we have only received an EXIT record during the school year, and no EOYA record has been submitted. The report is only important during the EOYA submission window and will be filterable by grade level
KIDS Record Type: N/A
Update/ Refresh Cycle: Automatic

Report Name: EXIT Comparison
Report Description: This report lists all students that have an EXIT record submitted where the Accountability School does not match a previously submitted ASGT, EOYA, or TEST record. The report is a tool to help schools/districts identify EXIT records that may have been submitted in error.
KIDS Record Type: EXIT
Update/ Refresh Cycle: Automatic

Report Name: Graduation Comparison Report
Report Description: This report lists all students which have been reported as graduated by more than one Accountability School in the same school year, even if the schools are in the same district. A graduate is defined as a student who has had an EXIT record submitted to KIDS by their Accountability School with a value of 8: Graduated with regular diploma in EXIT/Withdrawal Type. Only one school can award a diploma to a student. A separate row will be populated for each Accountability School reporting the student as a graduate.
KIDS Record Type: EXIT
Update/ Refresh Cycle: Automatic

Report Name: Virtual Schools Comparison Report
Report Description: This report shows any student submitted as a virtual student (D17) on an EOYA record who was not submitted previously as a virtual student on either an ENRL record or any student reported as a virtual student on either the ENRL collections who was not reported as a virtual student on their EOYA record.

KIDS Record Type: N/A
Update/ Refresh Cycle: Automatic
