Guidelines for Reporting Early Childhood Program Participants in KIDS

Introduction:
As part of the process to build a complete history of a student’s learning experiences connected through KSDE’s longitudinal data system, children participating in certain early childhood programs administered by early childhood educational entities in Kansas should have Kansas Individual Data on Students (KIDS) State Student Identifiers (SSIDs) assigned and may need to be reported on several KIDS collections.

KIDS SSIDs are generated for the following early childhood program participants:
- Kansas Parents as Teachers Program (KPAT)
- Early Childhood Special Education Part B, Section 619
- Preschool-Aged At-Risk (State Pre-K 4 Year Old At-Risk)
- Kansas Pre-K Pilot (KPP)

A child participating in any of the early childhood programs listed above administered by a district or other entity should have an SSID generated for them. The SSID may be generated via the KIDS Collection System or Foundations for School Success. Because there are many programs that require an SSID for participants, a child may already have an SSID when they enroll in your district or program for the first time. A search can be done to find existing SSIDs for children by using the “Search Core Data” functionality in KIDS.

Note: Once a grade level is entered in KIDS, that grade level should remain for the entire school year even when a child has a birthday. For example, a child that is sent on a KIDS record in August as grade level ’01’ = 3-year old preschooler should remain as a 01 grade level throughout the entire school year—even when the child has a birthday and turns 4 years old. A change in KIDS grade level should only occur when the child changes programs or when a new school year rolls over. The one exception to this rule is when a student who is participating in a Preschool-Aged At-Risk (State Pre-K 4 Year Old At-Risk) program receives an Individualized Education Plan (IEP) and receives special education services. The grade level for that child does need to be changed to ‘02’ = 4-Yr-Old Preschooler.

What’s New?

The name of the State Pre-K 4 Year Old At-Risk program has been changed to the Preschool-Aged At-Risk program to reflect changes in statute.

The field D57 should only be marked “Yes” if a student is included on the Kansas Preschool Pilot roster in a district that has received a Kansas Preschool Pilot grant for the 2019-2020 school year.

Help Desk Protocol:
Questions pertaining to technical issues such as an error screen when trying to log in, files that are rejected, etc. should be directed to the IT Help Desk at 785-296-7935. All other content questions should be directed to the appropriate help desk staff for each program.
Kansas Parents as Teachers Program (KPAT):

Child’s Age: Prenatal to kindergarten entry

Authorizing Agency: Kansas State Department of Education (KSDE)

The Parents as Teachers® (PAT) evidence-based affiliate model provides parents with the skills and knowledge they need to help make informed decisions regarding their child’s education. The program includes personal visits, group connections, health, vision, hearing and developmental screenings, and supports family connections with other community services.

KSDE serves as the Parents as Teachers® State Office and supports local programs with implementing the Parents as Teachers affiliate model. The KPAT program is available to any parent, including fathers, relatives as caregivers, and foster and adoptive parents, who has a child under the age of kindergarten entry and lives within a participating school district. The entity fiscally responsible for the program (this could be a consortium of districts) is also responsible for generating SSIDs for the participants. Note: KPAT consortiums should indicate the resident district according to where each child resides when submitting data. More information about KPAT programs in Kansas can be found here: on the KPAT Webpage.

When a district has a KPAT program, they may choose to document it in the Directory Updates application with a new building number to indicate that it is an unaccredited program. The district should use that building as the Attendance School/Program Identifier building on an ASGT record when uploading KIDS Collection records. The ASGT record should also have the district central office or any other accredited building number in their district as the Accountability School Identifier and the Funding School. Alternatively, a district may choose to not create a new building number to document a KPAT program, but rather to use the district central office or even an elementary building depending on what is appropriate for the district.

Obtaining State Student Identifiers: A child participating in a KPAT program will need to have a KIDS SSID generated for them. There are two recommended options:

- Generate the SSID within Foundations for School Success
- Submit an ASGT Record to the KIDS Collection System

Because there are many programs that require an SSID for participants, a child may already have an SSID when they enroll in a PAT program for the first time. When using KIDS to generate the SSID, a search can be done to find existing SSIDs for children by using the “Search Core Data” functionality or by submitting a QERY record to the KIDS Collection System. Foundations for School Success does not provide the option of searching for an SSID before generating an SSID, but it does compare the data submitted to the existing data in KIDS to find existing children that match the core data.

KIDS Grade Level: The grade level of the child being reported in a KPAT program via a KIDS Record should be one of the following values (see the KIDS File Specifications document for more detailed information about grade levels):

- ‘00’ = Birth – 2-years old
- ‘01’ = 3-year old preschooler
- ‘02’ = 4-year old preschooler
- ‘03’ = 5-year old and older preschooler
- ‘04’ = Preschool-Aged At-Risk (State Pre-K 4 Year Old At-Risk)

KPAT Participants and KIDS Collection Records: See the guidance in the “KIDS Collection Records” section.

These students should be collection ENRL, MILT, and EOYA records with a Yes in D58. Only children receiving services supported by the Kansas State Department of Education’s Kansas Parents as Teachers grant should be marked as 1. Children who receive Parents as Teachers programming that is supported
through other funding sources should have a zero in this field. It is not necessary to send EXIT records for KPAT participants that leave, discontinue, or age out of the KPAT program.
**KIDS and Infant Toddler Early Intervention Services, Part C (tiny-k):**

**Child’s Age:** Birth through 2 years

**Authorizing Agency:** Kansas Department of Health and Environment (KDHE)

Part C of IDEA is referred to as Kansas Infant-Toddler Services/tiny-k. Kansas Infant Toddler Services (authorized by the Individuals with Disabilities Education Act - IDEA Part C) is administered by the Kansas Department of Health and Environment (KDHE). KDHE provides grants to local networks to assist in maintaining and implementing a statewide system of coordinated, comprehensive, multidisciplinary early intervention services for infants and toddlers with disabilities (birth through 2) and their families.

**Obtaining State Student Identifiers:** Starting in the 15-16 school year, children participating in the Infant Toddler Part C Networks will not be assigned KIDS SSIDs.
KIDS and Early Childhood Special Education Part B, Sec 619 Program (Part B):

Child’s age: 3 – 5 years

Authorizing Agency: KSDE

The IDEA Preschool Program (Part B, Section 619) Early Childhood Special Education is designed to guarantee a Free Appropriate Public Education (FAPE) to children with disabilities age three through five. Under this program preschool children with disabilities are entitled to special education and related services in the Least Restricive Environment (LRE). It addresses individual needs within the context of developmentally appropriate activities, including early learning experiences in language, pre-reading and writing skills, play, and other social emotional areas. More information on Part B of IDEA may be found on the Special Education Early Childhood webpage.

Obtaining State Student Identifiers: A child receiving Part B services will need to have an SSID generated for them.
- Submit an ASGT Record to the KIDS Collection System

KIDS Grade Level: The grade level of the child being reported to KIDS should be one of the following values for a child receiving Part B services (see the KIDS File Specifications document for more detailed information about grade levels):
  - ‘01’ = 3-year old preschooler
  - ‘02’ = 4-year old preschooler
  - ‘03’ = 5-year old and older preschooler

Important Note: When accredited private school students receive special education services part time from a public school (regardless of whether the services are physically located at the public school district, the private school, or at another location), both schools must work together on submitting data to the KIDS Collection System to make sure students are available in SPED-Pro. The SPED-Pro system is the KSDE application that gathers special education data on students with an IEP.

The private school should send all KIDS records for those students with the public school building as the Funding School. A public school should NOT send up those students with ‘0002’ in the Accountability School Identifier because those students are not unaccredited private school or homeschooled students. When a record is submitted with ‘0002’ in the Accountability School Identifier field, the Attendance School field is going to be the school/district of record for those students in KIDS for accountability purposes.

Part B Participants and KIDS Collection Records:
See the guidance in the “KIDS Collection Records” section.
KIDS and Kansas Pre-K Pilot (KPP):

Child’s Age: 3 or 4 years

Authorizing Agency: KSDE

The Kansas Preschool Pilot provides school districts and community partners with grant funding to support preschool programming. Grants support children aged 3 through 5; children eligible for kindergarten (age 5 on or before August 31) may not be served with these funds. At least 50 percent of the children served by Kansas Preschool Pilot funding must meet at least one at-risk criteria. Kansas Preschool Pilot programs may include Preschool-Aged At-Risk (State Pre-K 4 Year Old At-Risk), Head Start, Early Childhood Special Education, and community preschool or child care programs.

Participating programs in the KPP need to obtain KIDS SSIDs for the children in the program.

Obtaining State Student Identifiers: A child participating in an approved KPP will have an SSID created through the Foundations for School Success application.

KIDS Grade Level: The grade level of the child being reported to KIDS should be one of the following values for a child receiving KPP services (see the KIDS File Specifications document for more detailed information about grade levels):

- ‘01’ = 3-year old preschooler
- ‘02’ = 4-year old preschooler
- ‘04’ = Preschool-Aged At-Risk (State Pre-K 4 Year Old At-Risk)

KPP Participants and KIDS Collection Records: See the guidance in the “KIDS Collection Records” section.

These students should be collection ENRL, MILT, and EOYA records with a Yes in D57. Only include students who are a part of the grant funded KPP program in D57. It is not necessary to send EXIT records for KPP participants that, discontinue, age out, or leave the program.
KIDS and Preschool-Aged At-Risk (State Pre-K 4-Year-Old At-Risk):

Child’s Age: 3 or 4 years

Authorizing Agency: KSDE

The children enrolled as Preschool-Aged At-Risk (State Pre-K 4-Year-Old At-Risk) are to be counted in the same manner as kindergarten students with funding based on children in attendance on the September 20th count day. Although at this point in time, children served by IDEA preschool special education programs cannot generate funds for this State program, children who meet the criteria for the Preschool-Aged At-Risk (State Pre-K 4-Year-Old At-Risk) may be physically in the same classroom as children from the aforementioned program and/or typically developing preschool-aged children.

The program provides school districts with funding for preschool-aged students. Each preschool-aged at-risk student who is enrolled in a school district and receiving services is counted as 0.5 FTE in calculating a district’s enrollment and accompanying weightings. Once districts have been notified that their program has been selected for funding, the four-year olds must be included in the enrollment counts when calculating the school district’s general fund.

Obtaining State Student Identifiers:
A child participating in Preschool-Aged At-Risk (State Pre-K 4-Year-Old At-Risk) will have an SSID created via KIDS Collection just like other students attending a district.

KIDS Grade Level:
The grade level of the child being reported to KIDS should be one of the following values for a child participating in a State Pre-Kindergarten Program (see the KIDS File Specifications document for more detailed information about grade levels):

’04’ = Preschool-Aged At-Risk (State Pre-K 4-Year-Old At-Risk)

State Pre-Kindergarten Program Participants and KIDS Collection Records:
See the guidance in the “KIDS Collection Records” section.
Any KIDS Collection Records:
Here are some guidelines for what building codes to enter for the early childhood program participant:

Accountability School: Identifier for the accredited school in the district which administers the program. In the case that the program does not have a particular building associated with it, use the district central office code.

Funding School: This should be the same building code indicated in the Accountability School field.

Attendance School: Building code where the program/activities occur. In the case that the program does not have a particular building associated with it, use the district central office code in the district where the activities occur.

Multidistrict programs: In the event that the early childhood program is part of a consortium or cooperative involving multiple districts, a user can request access to the KIDS Collection System for multiple districts to submit KIDS records for each of those districts. (See the Multi-District Access to KIDS document on the KIDS website.) In the case that the program is not owned by a specific district or does not have a particular building associated with it; use the district central office code of the child’s resident district as the Accountability School.

Note: Consult the KSDE Education Directory to find the 4-digit number assigned to the building to be sent to the KIDS Collection System, or consult the designated KIDS person in the school or district.

Entry Dates:
Here are some guidelines for what dates to enter for the early childhood program participant:

School Entry Date: This should be the date the child enrolls in the Accountability School for the preschool program.

District Entry Date: This should be the date the child enrolls in the district for the preschool program even if it is not the current program that is being reported in KIDS this year (e.g. if a student participated in a district sponsored PAT program last year, the District Entry Date should reflect the date the student began participating in the PAT program last year.) This date will not change until the child moves away from the district.

State Entry Date: This should be the date the child enrolls in the State for a preschool program. The State Entry Date will remain the same date on all KIDS records until the child moves outside of Kansas.

KIDS EXIT Records:
EXIT records should not be used to indicate that a child has completed an early childhood program.

The following guidance pertains to students participating in an Early Childhood Special Education Part B, Sec 619 Program or a Preschool-Aged At-Risk (State Pre-K 4-Year-Old At-Risk) program unless otherwise noted.
Part B & Pre-Kindergarten Program Participants and KIDS Collection Records:

EXIT Records: EXIT records should only be sent when a child is no longer associated with the Accountability School and should not be sent when a child’s participation in a program ends. For example, when services a student receives from an Early Childhood Special Education Part B, Sec 619 Program ends, a KIDS EXIT record is NOT required. When a student that has received services from an Early Childhood Special Education Part B, Sec 619 Program moves out of the district, a KIDS EXIT record should be sent.

EOYA Records: EOYA records for children in early childhood programs need to be submitted by accredited public and private school districts. EOYA records should be submitted for all children participating in Education Part B, Sec 619 Program, a Preschool-Aged At-Risk (State Pre-K 4-Year-Old At-Risk) program, Kansas Parents as Teachers program, or a Kansas Preschool Pilot. Submitting an EOYA record, does not require the schools/districts to claim the child.

EOYA Data Fields: Here are some guidelines for some of the required fields on EOYA records:

Cumulative Number of Days in Membership and Cumulative Number of Days Attended: This information is based on the length of time the student is associated with your school or district as a whole. Membership and attendance data for children with a Current Grade Level 00-04 will not be included in a school or districts Attendance Rate for accountability calculation. Data is required in these fields, but the data is not used in the accountability calculation for the district. Participants in the KPAT program should consider each visit as one (1) day of attendance.

Primary Disability Code: For children ages 0-2 years old, do not report a value in Primary Disability Code if the child does not have an Individual Education Plan (IEP) even if the child is receiving services through an Individualized Family Service Plan (IFSP).

Qualified for 504: Leave this field blank unless a disability was indicated in Primary Disability Code.

Residence of Homeless Student while Homeless: This field should be indicated if applicable.

Immigrant Student: This field does not apply to children younger than 3 years old, per the federal definition for receiving these services. Indicate only for children 3 years old or older, if applicable.

ENRL Records: Preschool-Aged At-Risk (State Pre-K 4-Year-Old At-Risk) and 3, 4, and 5-year-old students with an IEP must be submitted on ENRL and MILT records to generate state funding. Early childhood students without an IEP and other non-funded preschool programs should be included on ENRL records; however, these students will not generate state funding. Also included for counts are:

Kansas Pre-K Pilot (KPP): An indication that the child participates or participated in the Kansas Preschool Pilot during this school year. This field is required in grades 01-04 where the district is participating in the Kansas Preschool Pilot.

Kansas Parents as Teachers Program (KPAT): Required for student grades 00-04. Indicator of a student who participates or participated in a State funded Kansas Parents as Teachers Program, during this school year.

Minutes Enrolled: Required for ENRL records. When reporting minutes for Kansas Pre-K Pilot (KPP) and Kansas Parents as Teachers Program (KPAT) participants sum all the minutes for a week and divide by 5.

TEST and SMSC Records: Early childhood students should not be included on TEST or SMSC records.
Related Documentation:
Consult the following documents for additional information.

The following KIDS documents are located on the KIDS Project Documents website.

- **KIDS 2019-2020 File Specifications Document**: This document serves as the data dictionary for all data elements collected through the KIDS Collection system.
- **KIDS 2019-2020 KIDS Collection System User’s Guide**: This document is a resource designed for those users accessing the KIDS Collection system to submit student data.
- **KIDS 2019-2020 Submission Details Documents**: These documents review the required and optional fields for each record type to the KIDS Collection System, and also includes recommendations and tips for submitting each record type to the system.
- **Multi-District Access to KIDS Document**: This document provides details about how to request access to KIDS Collection System for multiple districts and how to use the system for multiple districts.

**KSDE 2019-2020 Educational Directory**: This document will provide valid building codes for school buildings and district central offices in Kansas and may be found on the KSDE website at [ksde.org](http://ksde.org) on the “Directories” page.
